

API Cost Breakdown

Full cost & margin analysis per pricing tier

01	Video API Costs	fal.ai — per second billing
02	Text Agent APIs	DeepSeek — 10-agent harness
03	Final Margin Summary	Worst case — no caching

fal.ai — Video API Pricing

BILLING MODEL

Pay per second of generated video · One API key for all users · Hard limits enforced via Supabase

MODEL PRICING

Model	Cost/sec	Resolution	Assigned Tier	Notes
Wan 2.6	\$0.05/sec	1080p	\$29 Starter	Fast, clean quality for social clips
Kling 3.0	\$0.10/sec	1080p	\$49 Growth	Cinematic motion, natural characters
Veo 3.1 Fast	\$0.15/sec	4K	\$99 Pro	Best quality, native audio support

3 MINUTES OF VIDEO = 180 SECONDS — COST PER USER/MONTH

MODEL	CALCULATION	VIDEO COST	REVENUE	PROFIT
Wan 2.6	180s × \$0.05	\$9.00	\$29	\$20.00
Kling 3.0	180s × \$0.10	\$18.00	\$49	\$31.00
Veo 3.1	180s × \$0.15	\$27.00	\$99	\$72.00

10-Agent Harness — Cost Analysis

AGENTS RUNNING CONCURRENTLY PER CAMPAIGN

Template · Remotion · Higgsfield · Video Editor · Twitter · Instagram · LinkedIn · TikTok · YouTube · Facebook

TEXT MODEL SELECTION BY TIER

Tier	Model	Price (in/out per 1M)	Why
\$29 Plan	DeepSeek V4 Flash	\$0.14 / \$0.28	High concurrency, no 429 errors
\$49 Plan	DeepSeek V4 Flash	\$0.14 / \$0.28	Same model, more campaigns
\$99 Plan	DeepSeek V4 Pro	\$0.32 / \$0.43	Deep reasoning, premium strategy

AGENT COST — 50 CAMPAIGNS/MONTH (NO CACHING)

Per campaign: 10 agents × ~50k tokens = 500k tokens = ~\$0.10 per campaign
50 campaigns/month = \$5.00 total agent cost per user
With prompt caching (50% off): ~\$2.50/month per user

Worst case (no caching, 50 campaigns) = \$5.00

Best case (with caching, 50 campaigns) = \$2.50

WHAT IT DOES

Routes every inbound call, checks live calendar, books appointments instantly, sends confirmations, and auto-follows up — handling all 10 agent channels simultaneously per campaign with zero human input.

WHY INVEST

Agent costs run \$2.50–\$5.00 per user/month — less than a cup of coffee. At 50 campaigns, you're paying under \$0.10 per campaign for a fully autonomous 10-agent pipeline that would take a human team hours.

Final Margin Summary

Worst case scenario — no prompt caching · All limits enforced via Supabase

\$29 Starter	\$49 Growth	\$99 Pro
Wan 2.6	Kling 3.0	Veo 3.1 Fast
Video API Cost	Video API Cost	Video API Cost
Agent Cost	Agent Cost	Agent Cost
Infra / Misc	Infra / Misc	Infra / Misc
Revenue	Revenue	Revenue
Profit: \$15.00	Profit: \$25.00	Profit: \$66.00
52% margin	51% margin	67% margin

SCALE PROJECTION

100 users (avg \$49/mo) = ~\$2,500 profit/month
1,000 users (avg \$49/mo) = ~\$25,000 profit/month

All limits enforced via Supabase
Users cannot exceed monthly quotas

- 24/7 Autonomous Continuity

AI agents capture, route, and book leads with zero interruption.
- Business Week Engineering Support

High-tier engineering, direct system updates, personal optimization.
- Continuous Infrastructure Integration

Zero-latency ML modifications — your stack adapts to every shift.
