

Ladder Internships Application Form

Ladder Internships is a world-class internship program for ambitious students. In the program, students work with top start-ups and NGOs to develop real-world projects.

The Startup internship program runs 8 weeks, costs \$2990, and involves weekly meetings with a supervisor from the start-up.

The CEO internship program: costs \$4990 and involves working directly with a start-up CEO from a FAANG background (Facebook, Google, etc.). This is our program for our most ambitious interns.

The Combination program: Offers our flagship CEO internship program in combination with a mentored research program. The joint program is \$7400.

There is full financial aid for students with need. The program is selective.

The admission deadline for our Summer II cohort (starting July 13th, 2026) is June 30th, 2026.

What is your full name? *

Awais Siddique

What is your first name/preferred name? *

Awais

What is your email ID? *

Please enter only 1 valid email address!

awais201001@gmail.com

What is your phone number? *

Please include country code, e.g., +1-808-XXX-XXXX

+923337146571

What gender do you most identify with? *

Male

What is your date of birth? *

10/11/2011

Please select your closest timezone *

If your timezone is not present, please select the timezone you are closest to.
We use this for company matching purposes.

India Standard Time (IST, GMT +5.5)

What country do you currently live in?

Pakistan

Which city do you currently live in? *

Multan

What is the name of your current school? *

Pak-Turk Maarif International Schools & Colleges (Model Town Campus)

Which cohort are you applying for? *

2026 Summer II Cohort

What grade are you in? *

11th

Which internship program are you applying to? *

If you would like to apply for financial aid, please note that we're currently offering aid only for the Startup Internship Program!

Startup Internship Program: This program involves interns working closely with companies on projects aligned with their areas of interest. The program spans 8 weeks with a weekly time commitment of 5-10 hours.

CEO Internship Program: In this flagship program, interns work directly with a start-up CEO with a FAANG (e.g., Facebook, Google, McKinsey) background. Across the 8-week program, interns contribute to high-impact projects with a weekly time commitment of 5-10 hours.

Combination Program: In this program, students complete both the CEO Internship Program and a mentored research program. A total time

commitment of 5-10 hours per week, with the goal of gaining experience in a professional work environment and completing a college-level research paper.

University Internship Program: This program involves interns at the university level working closely with companies on projects aligned with their areas of interest. The program spans 8 weeks with a weekly time commitment of 5-10 hours.

Note: The University Internship program is only for students who are currently in university.

Ladder Startup Internship Program

What year will you graduate from your current school? *

Please write as full year (e.g., 2024). If you are not currently in school, please put your most recent graduation year.

2028

What is your parent/guardian's full name? *

Please enter only 1 individual's information!

Muhammad Siddique

What is your parent/guardian's email address? *

What is your GPA at school? (If a current student) *

3.7 (estimated my school doesnt offer GPA but my class 9th exams had 85% with 94% i

If you have taken any standardized tests, could you share your scores here?

Student Response: Why are you a good candidate for our Internship program? *

300 words or less

I think what makes me a good candidate for the Ladder Internship is not that I have everything figured out, but that I genuinely want to learn.

I have always been curious about how things work, whether that means exploring new ideas, taking on projects outside of school, or trying to understand how businesses and startups grow. The more I learn, the more I realize how much there is still to discover, and that excites me.

One of the reasons I am applying to Ladder is because I want exposure to real work and real people. School teaches many important things, but I am eager to see how teams solve problems, make decisions, and turn ideas into something meaningful. I want to learn from people who have experienced those challenges firsthand.

I am not afraid of difficult tasks or situations where I do not know the answer immediately. In fact, some of my biggest moments of growth have come from stepping into unfamiliar territory and figuring things out along the way. I enjoy learning, asking questions, and improving through experience.

If selected, I would bring curiosity, commitment, and a willingness to contribute wherever I can. More than anything, I would bring genuine enthusiasm for the opportunity to learn from others and grow through the experience.

What areas for the internship are you interested in? *

Select an option

Software engineering ✕

Machine Learning/AI ✕

Web design/UIUX ✕

Tech/Deep Tech ✕

Please describe in detail your specific skill level in different programming languages *

(We don't require any technical knowledge for the tech field. We are only asking this to make more informed decisions on company matching)

I have experience building and launching several software projects, including my own platform, Codeply (codeply.online). Through these projects, I have developed hands on experience across both frontend and backend development.

The programming languages I am most familiar with are Python, JavaScript, TypeScript, PHP, HTML, CSS, and LaTeX. I would consider Python one of my strongest languages, and I have used it for AI related projects, automation, backend systems, Research, and general software development.

In terms of frameworks and tools, I have worked with React, Electron, Laravel, and Vite, along with various APIs, deployment platforms, and development workflows. These technologies have allowed me to build web applications, desktop applications, and full stack projects.

Most of my technical knowledge comes from creating real projects and solving practical problems rather than only studying theory. Through this process, I have learned how to debug issues, work with unfamiliar technologies, read documentation, and continuously improve my skills.

Overall, I would describe my technical skill level as intermediate to advanced for a high school student, with experience building complete applications and the ability to learn new technologies quickly when needed.

Why are you interested in this area? *

Please write no more than 200 words.

My interest in technology began during the COVID 19 pandemic when I was in Class 5 and started learning Python with the help of my father. What started as simple curiosity quickly turned into a passion. I spent countless hours building projects, experimenting with new ideas, and teaching myself new skills through trial and error.

One of my favorite projects was building my own Jarvis style AI assistant. Before modern LLMs became widely available, I created systems that could automate tasks for me. As AI technology evolved, I integrated models like ChatGPT and Claude to make the assistant even more capable. It could help manage emails, write content, control smart devices such as my lights, and automate many everyday tasks.

What excites me most about software engineering, AI, and deep tech is the ability to create things that genuinely make life easier. I enjoy the process of identifying a problem, designing a solution, and watching an idea become a real product.

Technology is more than just an academic interest for me. It has been a hobby, a creative outlet, and a way for me to continuously challenge myself and learn. That is why I am excited to further explore these fields through hands on experience and mentorship.

What kind of role are you looking for? *

Within the field of interest that you mentioned, what kind of work do you want to be involved in during the internship?

For example, are you interested in a coding internship, marketing role, data analysis, research, or something else? If you have a specific focus in mind, let us know. If you're open to multiple roles, you can mention that too!

I am primarily interested in software engineering and AI related roles where I can contribute to building real products and solving technical problems. I enjoy coding, developing features, working with APIs, and turning ideas into functional applications.

I am also interested in machine learning and AI research opportunities, particularly projects that explore how intelligent systems can be applied to solve practical problems. I would love to gain exposure to how AI products are designed, developed, and deployed in real-world environments.

In addition, I have an interest in web development and UI/UX design because I enjoy creating products that are both functional and easy for users to interact with. Understanding how technology and design work together is something I find particularly interesting.

While software engineering and AI are my primary interests, I am open to a variety of technical roles and would be excited to contribute wherever I can learn, grow, and make a meaningful impact.

Please outline your other commitments and what times during week you would be available to meet with your company *

Please write no more than 200 words. The expectation is about 15 hours of work per a week for interns.

As it is currently my summer break, I have a flexible schedule and can comfortably commit the expected 15 hours per week to the internship.

Outside of the internship, my main commitments are personal projects, independent learning, and spending time with family and friends. These commitments are flexible, allowing me to prioritize internship responsibilities, meetings, and deadlines.

I am generally available throughout most weekdays and weekends, particularly during the afternoon and evening hours. I am also willing to adjust my schedule to accommodate meetings across different time zones if necessary.

Overall, I have the availability and flexibility needed to fully engage with the internship, contribute consistently, and make the most of the opportunity.

Where did you hear about us? *

Influencer(s)

Can you give us some more information about how you heard about this program? *

Please be as specific as possible e.g. "Mr Thomas Doyle of Springfield High School, Boston" or "I found it on XYZ website's blog on top summer programs"

I heard about the Ladder Internship Program through Instagram from the creator @col

Do you work with a private counselor outside of school? *

This will not affect your chances of acceptance into the program - it is simply for communication purposes with your counselor.

☐ No

Do you require financial aid to do the program? *

This is usually for students of families who make less than 50,000 per a year USD. Though if you need financial aid and you don't fit into that criterion, we can be flexible!

Please note that financial aid is exclusively available for the Startup Internship program.

☒ Yes

Please describe your family's financial background and how much aid you would need. *

My family's annual income is approximately \$15,000 USD. Given our financial circumsta

Would you still be able to participate in the program if you did not receive financial aid? *

☐ No
